

If you have recently moved into the area, please check if you live within the practice boundary before completing the registration form. If you do not live within the practice boundary, the practice will not be able to accept your registration application. During the current COVID-19 outbreak, we will be accepting new patients without seeing their ID and seeing this later, alternately, you can ring the bell during opening times and we can come to the door to check.

If you are not moving house outside the boundary of your current practice you are advised to remain temporarily registered with your current practice to ensure that you can continue to receive care from a health care professional who has immediate access to your full medical records.

New Registrations are encouraged, to be completed and submitted online. If this is not possible, you may print and complete manually and post through the Practice mailbox where we will process your Registration without Identity Checks. If you are unable to complete the form yourself then please contact us and we will be happy to complete on your behalf.
